## TUTTLE CREEK DAM

# FACT SHEET

## DAM SAFETY COMMUNITY MEETING

March 2002

**Thursday, May 2, 2002**

### **Community Meeting Scheduled**

The U.S. Army Corps of Engineers, Kansas City District has determined that an extreme flood or earthquake could cause significant damage to Tuttle Creek Dam. An Environmental Impact Statement and Evaluation Report have been developed to evaluate potential changes to the dam and its operation.

Beginning at 7:00 p.m. at the Manhattan, Kansas Holiday Inn, the Corps of Engineers will host a community meeting. The specific intent of this meeting is to discuss the documents, discuss alternatives for addressing these issues, discuss the Corps of Engineers' proposed alternative, and provide an opportunity for community opinions to be heard.

This meeting will be the second formal community input step in completing the Environmental Impact Statement for the proposed project as required by the National Environmental Policy Act of 1969, as amended. The Environmental Impact Statement assesses the significant environmental impacts of various project alternatives. Community input concerning the environmental and cultural resources, the alternatives under consideration, and the proposed alternative is essential to the development of an acceptable plan.

The Manhattan Holiday Inn is located at 530 Richards Drive, Manhattan, KS 66502  
(2 miles west of Highway KS-177 on KS-18. The hotel is on the north side of Highway 18 at Richards Drive)

Anyone interested in this issue is invited and welcome to attend this important community meeting.
